

## TP 250 PT0

All-round wood chipper for mounting on tractor

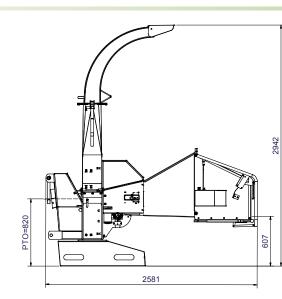

If you want large capacity, flexibility and a uniform chip quality from your wood chipper then TP 250 is the answer. TP 250 is a disc chipper with hydraulic feed. It is effective for cleaning up and chipping branches with a width of up to 250 mm in diameter. The large rotor disc with three knives combined with three anvils, a 90 degree cutting angle and two horizontal retract rollers ensure a very effective chipping of everything from thin branches to entire trees. Effect need from 60 to 140 hp. Standard on TP 250

- Integrated hydraulics system
- Three knives
- Three anvils in Hardox 400
- Two hydraulically powered feed rollers which ensure a powerful feeding
- Powerful tension spring on moving rollers
- Revolving ejector spout
- Wipers to ensure against accumulation of material at feed rollers and rotor housing
- Hydraulic adjustment of the roller speed and thereby the chip size
- Changeable casing in rotor housing
- Rotor lock for securing the rotor disc when changing knives
- PTO shaft
- Operating bar start/stop/reversing of the feed rollers
- Danfoss Hydraulic engines
- Tip-up funnel

## **TECHNICAL DATA**

S

| Max wood diameter        | 250 mm   |
|--------------------------|--|
| Max opening              | H x W = 260 x 350 mm   |
| Operation                | Return/forward/stop of feed rollers through operating bar (yellow) |
| Chipper principle        | Disc   |
| In feed angle            | 90°  |
| Feeding angle            | Parallel to driving direction                                      |
| In feed                  | 2 hydraulic feed rollers, spring compressed of 2 springs 8 mm      |
| Feed rollers             | Horisontal   |
| Rotordisc - diameter     | 960 mm, with changable end sections on ejector wings               |
| Rotordisc - Weight in kg | 272  |
| Number of knives         | 3 pcs.   |
| Chip lenght              | 0-13 mm (hydraulic ajustable)                                      |
| Anvil/Counter steel      | 1 horisontal and 2 vertical  |
| Power required           | 45-104 kW (60-140 hp)  |
| PTO rpm                  | 540 rpm or 1.000 rpm/min.  |
| PTO shaft                | Walterscheid 2400 series with freewheel, length = 560 mm           |
| 3-point linkage          | Category 2   |
| Chip capacity            | 10-25 m <sup>3</sup> /hour   |
| Weight                   | 1.065 kg   |

## **EXTRA EQUIPMENT**

| Stress control system  | For protections of the engine of the tractor by monitoring the rpm on the rotor disc                       |  |  |  |  |
|------------------------|--|--|--|--|--|
| Extended ejector spout | 500 mm vertical • 1.500 mm horisontal • Extended ejector spout across the tractor 3.700 mm, height 2230 mm |  |  |  |  |
| Hitch                  |  |  |  |  |  |
| Tip-up ejector spout   |  |  |  |  |  |
| Sliverbreakers         | Type A or B - are used if extra requirements for chip quality is needed                                    |  |  |  |  |
| Light bar              | Light bar with complete set of rear lights   |  |  |  |  |
| Tool kit               | Includes tools for daily service and maintenance   |  |  |  |  |
